

Press Release: Free Seminar For On-Line Chemical Analysis including TOC, Process Control & Ambient Air Monitoring

Date: 1st February 2010

Free Seminar: For On-Line Chemical Analysis including TOC, Process Control & Ambient Air Monitoring. To be held at Northampton Rugby Club, Wednesday 17th March 2010, 10am – 3pm

Metrohm UK offer a number of options to meet our customers training needs. Choose from seminars, on-site training or workshops. Our dedicated training professionals cover all aspects of ion analysis.

This free seminar, aimed specifically at the Process Industry, has been designed to demonstrate the benefits of On-Line Analysis, present the latest applications with real life case studies and give delegates the opportunity to get free technical help in the TOC / COD and Application Clinic.

This seminar is aimed at anybody working in the following roles:

Analytical Chemists
Chemical Engineers
Process Engineers
Plant Engineers
Plant Chemists
Production Analysts
Plant Managers
Q.C. Chemists
Lab Managers
Instrument Engineers

Working in any of the below industries:

Process Control
Waste Monitoring
Water / Environmental
Plating / Galvanic / Pickling
Aerospace
Chemical / Petrochemical
Finishers
Steel
Food
Automobile

Advantages of attending this seminar

- Learn how On-Line Chemical Analysis can benefit you
- Discover the latest applications
- Case studies show real life solutions
- Get technical help in our TOC /COD and Application Clinic

To register for this seminar visit www.metrohm.co.uk or email training@metrohm.co.uk

Timely and accurate analysis has never been more critical to the modern process industry

On-Line Analysis bridges the gap between the process and the laboratory. It enables all stages of the analysis to be fully automated. Quality control increases efficiency, economics and reduces waste. Analyse your product where it's made, at various points during the manufacturing process, using standard QC methods. Report the results automatically to the Process Control System and take remedial action.

Analytical Techniques Used:

Potentiometric titration, Karl Fischer (moisture content analysis), spectro/colorimetric analysis, ion specific electrodes, ion chromatography, voltammetry, and combustion.

Note to Editors:

Metrohm UK Ltd is the UK distributor of Metrohm AG, the leading manufacturer of Ion Analysis Instruments.

Metrohm is synonymous with potentiometric titration, Karl Fischer titration, ion chromatography and voltammetry solving your analytical chemistry problems with quality instrumentation and support services in the technologies of POTENTIOMETRIC TITRATION, KARL FISCHER TITRATION (moisture analysis), ION CHROMATOGRAPHY, VOLTAMMETRY (trace analysis), On-line & AT line analysis and VISCOMETRY.

Set up in 1995, Metrohm UK serves the key markets of the UK including the chemical, petrochemical and pharmaceutical industries, as well as the automotive and food sectors.
