

Press Release: Metrohm All-in-One IC Water Packages

Date: 27th January 2011

Modern ion chromatography (IC) allows efficient separation and determination of inorganic and low-molecular organic anions and cations.

Various separation mechanisms and types of detection as well as the possibility of automation and sample preparation make IC a proven routine method in water and environmental analysis.

Metrohm are now offering All-in-one IC Systems for professional water analysis:

2.882.8030 – Water Analysis Basic

Straight forward analysis of standard anions in drinking water, waste water etc.

2.881.8030 – Water Analysis Advanced

Straight forward analysis of standard anions and oxohalides in drinking water, waste water etc.

2.850.8130 – Water Analysis Complete

Straight forward analysis of standard anions and oxohalides and cations in drinking water, waste water etc.

Packages available for a limited time only.

Note to Editors:

Metrohm UK Ltd is the UK distributor of Metrohm AG, the leading manufacturer of Ion Analysis Instruments.

Metrohm is synonymous with potentiometric titration, Karl Fischer titration, ion chromatography and voltammetry solving your analytical chemistry problems with quality instrumentation and support services in the technologies of POTENTIOMETRIC TITRATION, KARL FISCHER TITRATION (moisture analysis), ION CHROMATOGRAPHY, VOLTAMMETRY (trace analysis), On-line & AT line analysis and VISCOMETRY.

Set up in 1995, Metrohm UK serves the key markets of the UK including the chemical, petrochemical and pharmaceutical industries, as well as the automotive and food sectors.
