

Press Release: tiamo™ – the No 1 titration software now even more powerful!

Date: 20th August 2010

tiamo™ – the No 1 titration software now even more powerful!
Metrohm present [tiamo™ 2.2](#), the latest version of the leading software for titration and more. tiamo™ 2.2 now enables control of thermometric titrations. Moreover, new commands have been implemented to increase the efficiency of automated Metrohm systems in the lab.

The new graphical editor allows users to get more out of their automated Metrohm titration systems. New methods can be drawn up quickly and easily by using the numerous templates. A few mouse clicks are all that is needed to adapt existing methods to particular users' needs.

As tiamo™ 2.2 now can also control the 859 Titrotherm, a wide range of new applications based on thermometric titration methods opens up to the user. tiamo™ 2.2 enables the most efficient use of automated Metrohm titration systems: Thanks to new commands, one and the same sample changer may now be shared by two or more working stations. Thus, one sample can be titrated while the next one is already being prepared or another measurement performed. This saves time and increases sample throughput.

Note to Editors:

Metrohm UK Ltd is the UK distributor of Metrohm AG, the leading manufacturer of Ion Analysis Instruments.

Metrohm is synonymous with potentiometric titration, Karl Fischer titration, ion chromatography and voltammetry solving your analytical chemistry problems with quality instrumentation and support services in the technologies of POTENTIOMETRIC TITRATION, KARL FISCHER TITRATION (moisture analysis), ION CHROMATOGRAPHY, VOLTAMMETRY (trace analysis), On-line & AT line analysis and VISCOMETRY. Set up in 1995, Metrohm UK serves the key markets of the UK including the chemical, petrochemical and pharmaceutical industries, as well as the automotive and food sectors.
